- Placement and Mastery Tests
- Teacher's Guide with Suggestions and Worksheets
- Award-winning Records Manager
- Intelligent Tutor
- Teacher Training and support

## The DynEd Advantage

*English for Success* prepares students to use English at school and in school subject areas like math, science, and history. It teaches the language of classroom presentations, explanations, questions, homework and tests. Its multisensory, interactive approach has significant advantages over text-based presentations. With increased English language proficiency, your students will show test gains in all subject areas. *English For Success* gives students the English language skills they need to succeed - not just in their English class - but in all of their classes and with their friends at school.

*English For Success* is really three courses in one, with each reinforcing the other:

- A *General English Course* that focuses on people, places, weather and daily activities, etc.
- A *Social and Situational Language Course* that focuses on typical school and telephone conversations among friends.
- A *Subject Preparation Course* that develops the English language framework and vocabulary necessary for students to participate and succeed in all subject areas.

## Contents

Designed especially for ages 11-17, this course has a total of 20 units, each one with 5 lesson types, including Warm-Up, School Life, School Subjects, Language Extension, and Speaking Up. Key vocabulary and grammar are introduced and recycled throughout in a carefully structured sequence that helps students acquire the English language skills they need as quickly and efficiently as possible.

### Warm-Up

Uses pictures to present and extend the grammar and vocabulary of daily life. Topics include seasons of the year, weather, transportation, descriptions of people and things, and occupations. The Grammar Focus section gives students practice with key structures from the lesson.

### School Life

Focus on conversational English in and around school. The main characters are a girl, age 16, and her brother, age 13, who attend an International School, with students from a variety of backgrounds. School-related topics include lunch menus, room locations, and class schedules.

### School Subjects

Present short illustrated talks in various subject areas, including math, science, geography, world history, and English. Key vocabulary and grammar for each subject area are presented and recycled, including the language of explanation, classification, comparison, numbers, and question formation.

### Language Extension

Cover general topics such as preferences, weather, occupations, and places of business. New language is introduced in a game-like format and is followed up with comprehension questions and Grammar Focus exercises.

### Speaking

Give students the chance to take advantage of Speech Recognition technology to practice their speaking. These motivating exercises provide additional repetitions of key vocabulary, grammar, and important phrases introduced and practiced in earlier lessons.

## Testing Tools

### Placement Test

DynEd's Placement test positions students at their appropriate starting point within DynEd's courses. The process is quick and easy, thanks to DynEd's computer-adaptive testing technology.

### Speaking Test

Using state-of-the-art speech recognition technology, DynEd's Speaking Test quickly and automatically measures students' oral proficiency, eliminating the need for expensive native language raters.

### Mastery Tests

DynEd's Mastery Tests confirm a student's grasp of the material within a course. Passing a Mastery Test gives students access to more advanced lessons.

### Intelligent Tutor

DynEd's Intelligent Tutor provides students with real-time, qualitative feedback that continuously helps them maximize the outcome of their DynEd study time.
